

STUDENTS FEED BACK ABOUT RACE(CE)

MEGHA K M

(2013-17 Batch CE)

**Position : QS,
Grandeur Fitout Technical Services LLC, Dubai**

Training objectives were clearly stated and explained in the beginning. There are too many points to list. Now I am feeling like the course was very relevant to my job and its helping me in most aspects of work. A very good mixture of theoretical and practical training.

Anusha Sajayan

(2013-17 Batch CE)

Position: Site Engineer

M/S P. K. Ramachandran & Company, Kochi

We had a software class during our final year period which was handled by Trivandrum based "INTERCAD Private Ltd. It was a beneficial class for most of us, especially for our project team. As our final year project was a design project, it helped us a lot in our project. The class was very good and was taken in a simple manner as everyone could catch up.
